Process Modeling Software Designed for Every Problem-Solver

Process Playground™

Included With **EngineRoom®**

Process Playground, included with EngineRoom®, gives quality teams a true digital twin of their process or production lines so they can test changes, analyze variability, and validate improvements before ever touching live operations. Process Playground's drag-and-drop design makes powerful modeling easy to learn, helping teams reduce guesswork and save time and money.

A Digital Twin for Process Changes

Process Playground goes beyond spreadsheets and static models, creating an interactive digital twin to test and validate improvements before real-world implementation.

## Experiment with More Ideas to Find the Best One *Faster*

Run unlimited simulations to compare scenarios, reduce trial-and-error, and optimize decisions without disrupting operations.

Software Built for Continuous Improvement

With an intuitive drag-and-drop interface, Process Playground makes process modeling easy for CI teams—no coding or steep learning curve required.

The Only Process Modeling Tool Inside a Complete CI Platform

Fully embedded in EngineRoom®, Process Playground is coupled with a full suite of Lean Six Sigma and data analysis tools for improvement teams.

Test Before You Invest

EngineRoom with Process Playground features tutorials, help articles, and how-to videos along with world-class customer support.

MoreSteam®

What If You Could Predict the Impact of Every Change? Now You Can.

Unexpected variability, bottlenecks, and system disruptions can derail even the best-designed processes. Process Playground mitigates risk by allowing teams to model real-world variation, and anticipate potential failures before they happen. By simulating process flow, teams can identify constraints, optimize resource allocation, and refine decision-making to maintain smooth operations. Instead of reacting to problems after they arise, organizations can proactively design processes that adapt to change and sustain efficiency under pressure.

Experiment
Use simulation data to verify process dynamics

Validate
Export simulation data and verify tested improvements

Optimize
Eliminate inefficiencies without increasing overhead costs

Predict
Stress-test processes for resilience and risk mitigation

Cut the Cost of Calculation with EngineRoom

EngineRoom® is the all-in-one Continuous Improvement platform, combining powerful data analysis, Lean Six Sigma tools, and process modeling to drive smarter, faster decisions all at an unbeatable price.

Save even more with scalable enterprise licensing and group-based pricing discounts.

$449
Per Year

Success Stories with Process Playground

Baptist Health South Florida cut emergency department wait times, achieving a sustained 30% reduction in turnaround times.

Medtronic boosted production by 11.6% with Process Playground:

"With most modeling software, the barrier to entry is so high, and the technology is so complex, you can see people's eyes glazing over. Process Playground is so elegantly simple. Give people a couple of intros, and they're off and running.

It's really transformed our Lean thinking."

— Ryan Magnuson
Senior Operational Excellence Program Manager

We build software to help people make important things work better.

MoreSteam enables organizations of all sizes to advance their performance by delivering powerful, scalable online training and technology for enterprise process improvement.
