

Lean Master Certification Program

Online & In-Person Blended Learning

A Lean Master fosters a culture of continuous improvement within an organization, encouraging team members to identify and address inefficiencies. Lean masters are committed to minimizing process waste and prioritizing work that delivers value to the customer. This program will develop you as a Lean Master that can drive positive change, enhance the agility of an organization, and create a workplace that values innovation and problem-solving.

This Program Includes

38 HOURS

Practice-Based eLearning

1 WEEK

In-Person Simulation-Based Workshop

3 HOURS

1-on-1 Coaching and Project Support

4 VIRTUAL

Instructor-Led Study Halls

1 YEAR

Subscription Access to EngineRoom® Data Analysis Software

What Will I Accomplish?

Upon completing the Lean Master Certification Program, attendees should be equipped to:

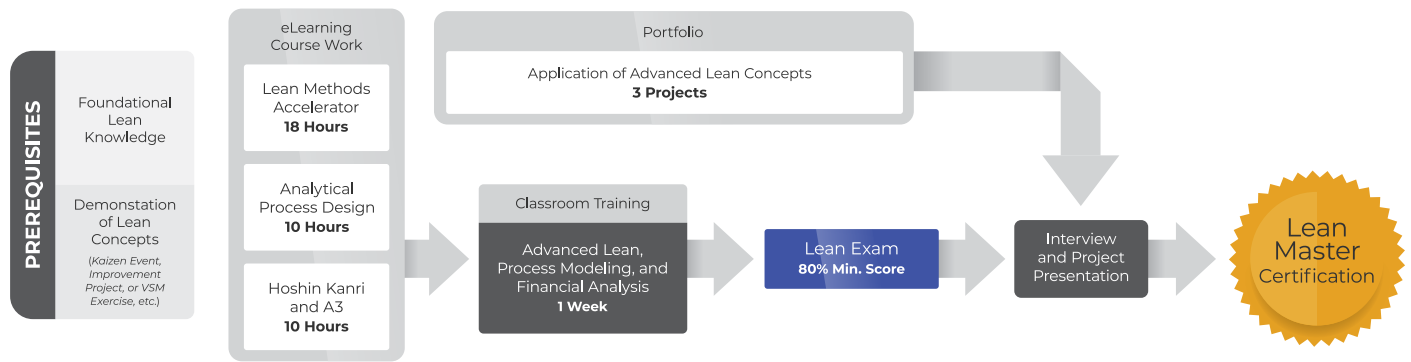

- Design and sustain Lean management systems that connect strategy and daily management into a cohesive operating model.
- Create the conditions for continuous improvement by making performance and problems visible, establishing effective leader standard work, and developing management practices that reinforce accountability and learning.
- Analyze, model, and improve complex processes by evaluating variability, constraints, capacity, and operational trade-offs for more informed and effective decision-making.
- Translate improvement opportunities into business terms that leaders value, including cost impact, capacity creation, investment justification, and return on investment.

Lean Master Program Structure

The effective combination of online coursework, virtual study sessions, and in-person training has a proven track record of propelling students beyond mere comprehension, fostering their confidence in becoming impactful Lean masters.

Curriculum

Advanced Lean Topics

Hoshin Kanri, A3 problem solving, leader standard work, visual management, Lean finance

Understanding the Current Conditions

Value stream analysis, current-state assessment, process modeling and simulation, performance prediction

Designing the Future State

Designing for flow, managing constraints, replenishment pull strategies

Leading Lean Transformations

Strategy deployment, organizational alignment, daily management systems, sustaining continuous improvement culture

Certification

Certification is awarded upon:

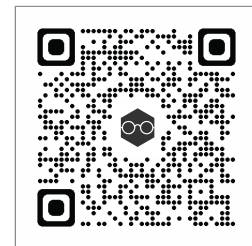

- Successful completion of the course work
- A passing score on the exam of 80% or higher
- Delivery of 3 projects where you have applied advanced Lean concepts and tools along with demonstration of Lean Master qualities in leading your teams and coaching your organization.

Pricing & Details

The Lean Master program runs annually in the fall. You must complete a short virtual interview prior to enrollment to give the instructors insights into your Lean journey.

The course is 10 weeks long and the enrollment fee covers costs for the online course, instructor-led sessions, in-person workshop, and supplemental materials for class. Travel expenses not included.

\$5,995
